Siteline™
CABINETRY

WELCOME TO SITELINE

SEE MORE. LEARN MORE. GET MORE.

When shopping for your new cabinets, we know it can feel a bit overwhelming. So many details, so many choices, so much potential confusion. Here's the good news - our local, authorized Siteline dealer is there to guide you every step of the way.

At Siteline, we work with our authorized dealers to create what you envision for your new kitchen, bath, mudroom, closet or laundry area. With a variety of style, material and finish/color choices, you can personalize new spaces to exactly your taste. We also offer a broad selection of interior options that customize your storage, fitting your unique needs.

By partnering with our local dealer experts, you are in good hands. We invite you to see more, learn more and get more with Siteline.

WOOD CHOICES

TIMELESS. NATURAL. ENDURING.

ALDER

Perfect for a wide range of themes, medium density Alder has a fine, flowing grain pattern and naturally warm coloration. Alder can create both charm and drama in your home, and is ideal for drier climates. Infrequent, tight knots and pin holes are a part of the natural look of Alder. Available with stains and glazes, and a clear finish option.

CHERRY

A luxurious choice for your home, moderately hard Cherry features warm color variation, which mellows with age adding character and grace. Cherry will vary from a light vanilla color to deep pink in its raw state, and become more red or copper in color when exposed to light. Pin holes, mineral streaks and sapwood are a part of the natural look of Cherry. Available with stains and glazes, and a clear finish.

MAPLE

For a décor with minimal texture, Maple offers the beauty of a strong hardwood, featuring a more uniform appearance and tighter grain pattern. Mineral streaks are part of the natural look of Maple, varying in size and quantity, and appearing darker when stained. Maple styles will gradually amber or yellow over time. Available with stains and glazes, and a clear finish.

RED OAK

An enduring hardwood, Red Oak features sweeping flame-like grain patterns and distinctive texture. Red Oak is ideal for traditional and transitional rooms. Some darker mineral streaks are common in furniture quality Red Oak. Available with stains and glazes, and a clear finish.

WOOD STAIN+GLAZE CHOICES

ALDER

Siteline stains are designed to complement, not hide, the natural beauty of wood grains. Stains add color and highlights to blend, not mute the character of your chosen wood.

PAINT CHOICES

Siteline painted finishes are designed to ensure color consistency and durability for your home. Our painted finishes are comprised of pigment layers to create consistency of color, depth of finish, luster and long-term durability. It is important to understand that all woods lose and gain moisture over time, which results in shrinkage or expansion. Because durability requires hardness, stress lines can appear in painted cabinetry at the corners of doors and at cabinet joints. These lines will be magnified by painted finishes but do not affect the durability.

DECORATIVE VENEER CHOICES

EXPRESSIVE. DISTINCT. REFINED.

DOMESTIC VENEER

Domestic Veneers are created from slices of wood, showcasing variations of weather, soil content and growing seasons of the natural habitat. Slicing for our flat cut Domestic Veneers is done parallel to a line through the center of the log, the result is a combination of cathedral and straight grain patterns. Rift Cut Veneers are manufactured by milling perpendicular to the log's growth rings producing a linear grain pattern. Veneers are most often used to produce high quality architectural millwork, and are applied to medium density fiberboard. Domestic Veneers are not grain-flow-matched on doors and drawer fronts. Available in five fashionable options, and a variety of finishes. Consult your authorized Siteline dealer for more information.

Alder Flat Cut

Cherry Flat Cut

Maple Flat Cut

Red Oak Flat Cut

Rift Cut White Oak

RECONSTITUTED VENEER

Reconstituted Veneers are high quality, re-engineered wood products made from fast-growing trees, harvested from environmentally managed forests in Africa, and supplemented with plantation-grown Poplar from Italy. The logs are trimmed, sawn to length, peeled and dried, then the veneer is dyed to produce the desired color. The dyed veneer is glued, stacked and pressed into large rectangular blocks which are sliced at precise angles to produce the desired grain patterns, then applied to medium density fiberboard. As with fabric, Reconstituted Veneers have dye lot differences in color and graining which is normal. The veneer is not grain-flow-matched on doors and drawer fronts. Available in seven upscale options. Consult your authorized Siteline dealer for more information.

ACRYLIC CHOICES + STYLE

VIBRANT. GLAMOROUS. CHIC.

If your kitchen or bath needs a little spicing up, perhaps an Acrylic finish is just the fix. Perfect as an accent or for the whole room, Acrylics are polymer high gloss, durable finishes applied to carefully selected medium density fiberboard for maximum color clarity and consistency. Our Acrylics feature a co-extruded polymer top layer which maximizes scratch resistance.

Siteline™ CABINETRY

SEE MORE. GET MORE.

Siteline Cabinetry offers style for miles. Like hundreds of miles, in fact. We invite you to take a closer look, and find out what a remodeling companion or new construction asset like Siteline can do for your next project. To see more and learn more, visit **SitelineCabinetry.com**.

To avoid dimensional changes in or damage to components of finished wood cabinetry, we recommend maintaining your environment between 25% and 50% relative humidity and a temperature range of 40 to 100 degrees.
