South Beach door style in Pure White and Linear Silver UltraLux.

See It In Your Mind. Then Hold It In Your Hands.

Enjoy samples of your favorite door/finish combinations in your home before you order cabinets.

Our color/finish/material/style combinations are virtually limitless! Your kitchen designer will help you define your favorite looks on your way to your new kitchen.

Sample doors are the best way to visualize what your ideas will look like in your home. Printed posters and brochures, and even designers' color chips, will never be as accurate – or as exciting – as a sample door custom-made to your specifications.

Before you order cabinets, order sample doors of the combinations you're most excited about. Live with the samples in your home until you know which look suits your family the best.

South Beach door style in Flint UltraLux.

Martin door style in Reclaimed Grey Textured Melamine and Acrilux II door style in Linear Bronze UltraLux.

Ultra Contemporary

UltraLux

Create a bold, contemporary statement with premium acrylic finishes engineered for exceptional beauty and durability. Whether you prefer the brilliance of high gloss or the understated elegance of UltraMatte, UltraLux complements modern, European, Asian, and minimalist designs with refined color, depth, and performance.

UltraLux finishes are created by laminating premium acrylic or polyethylene terephthalate (PET) to medium-density fiberboard (MDF), resulting in exceptionally durable surfaces engineered to resist scratches and maintain their beauty.

Acrilux II door style in Linear Bronze high gloss UltraLux.

Finishes

High-Gloss Acrylic

Our high-gloss finishes feature our most scratch-resistant acrylic surface for exceptional durability and brilliant reflectivity. Dry Erase-certified. Guaranteed never to ghost!

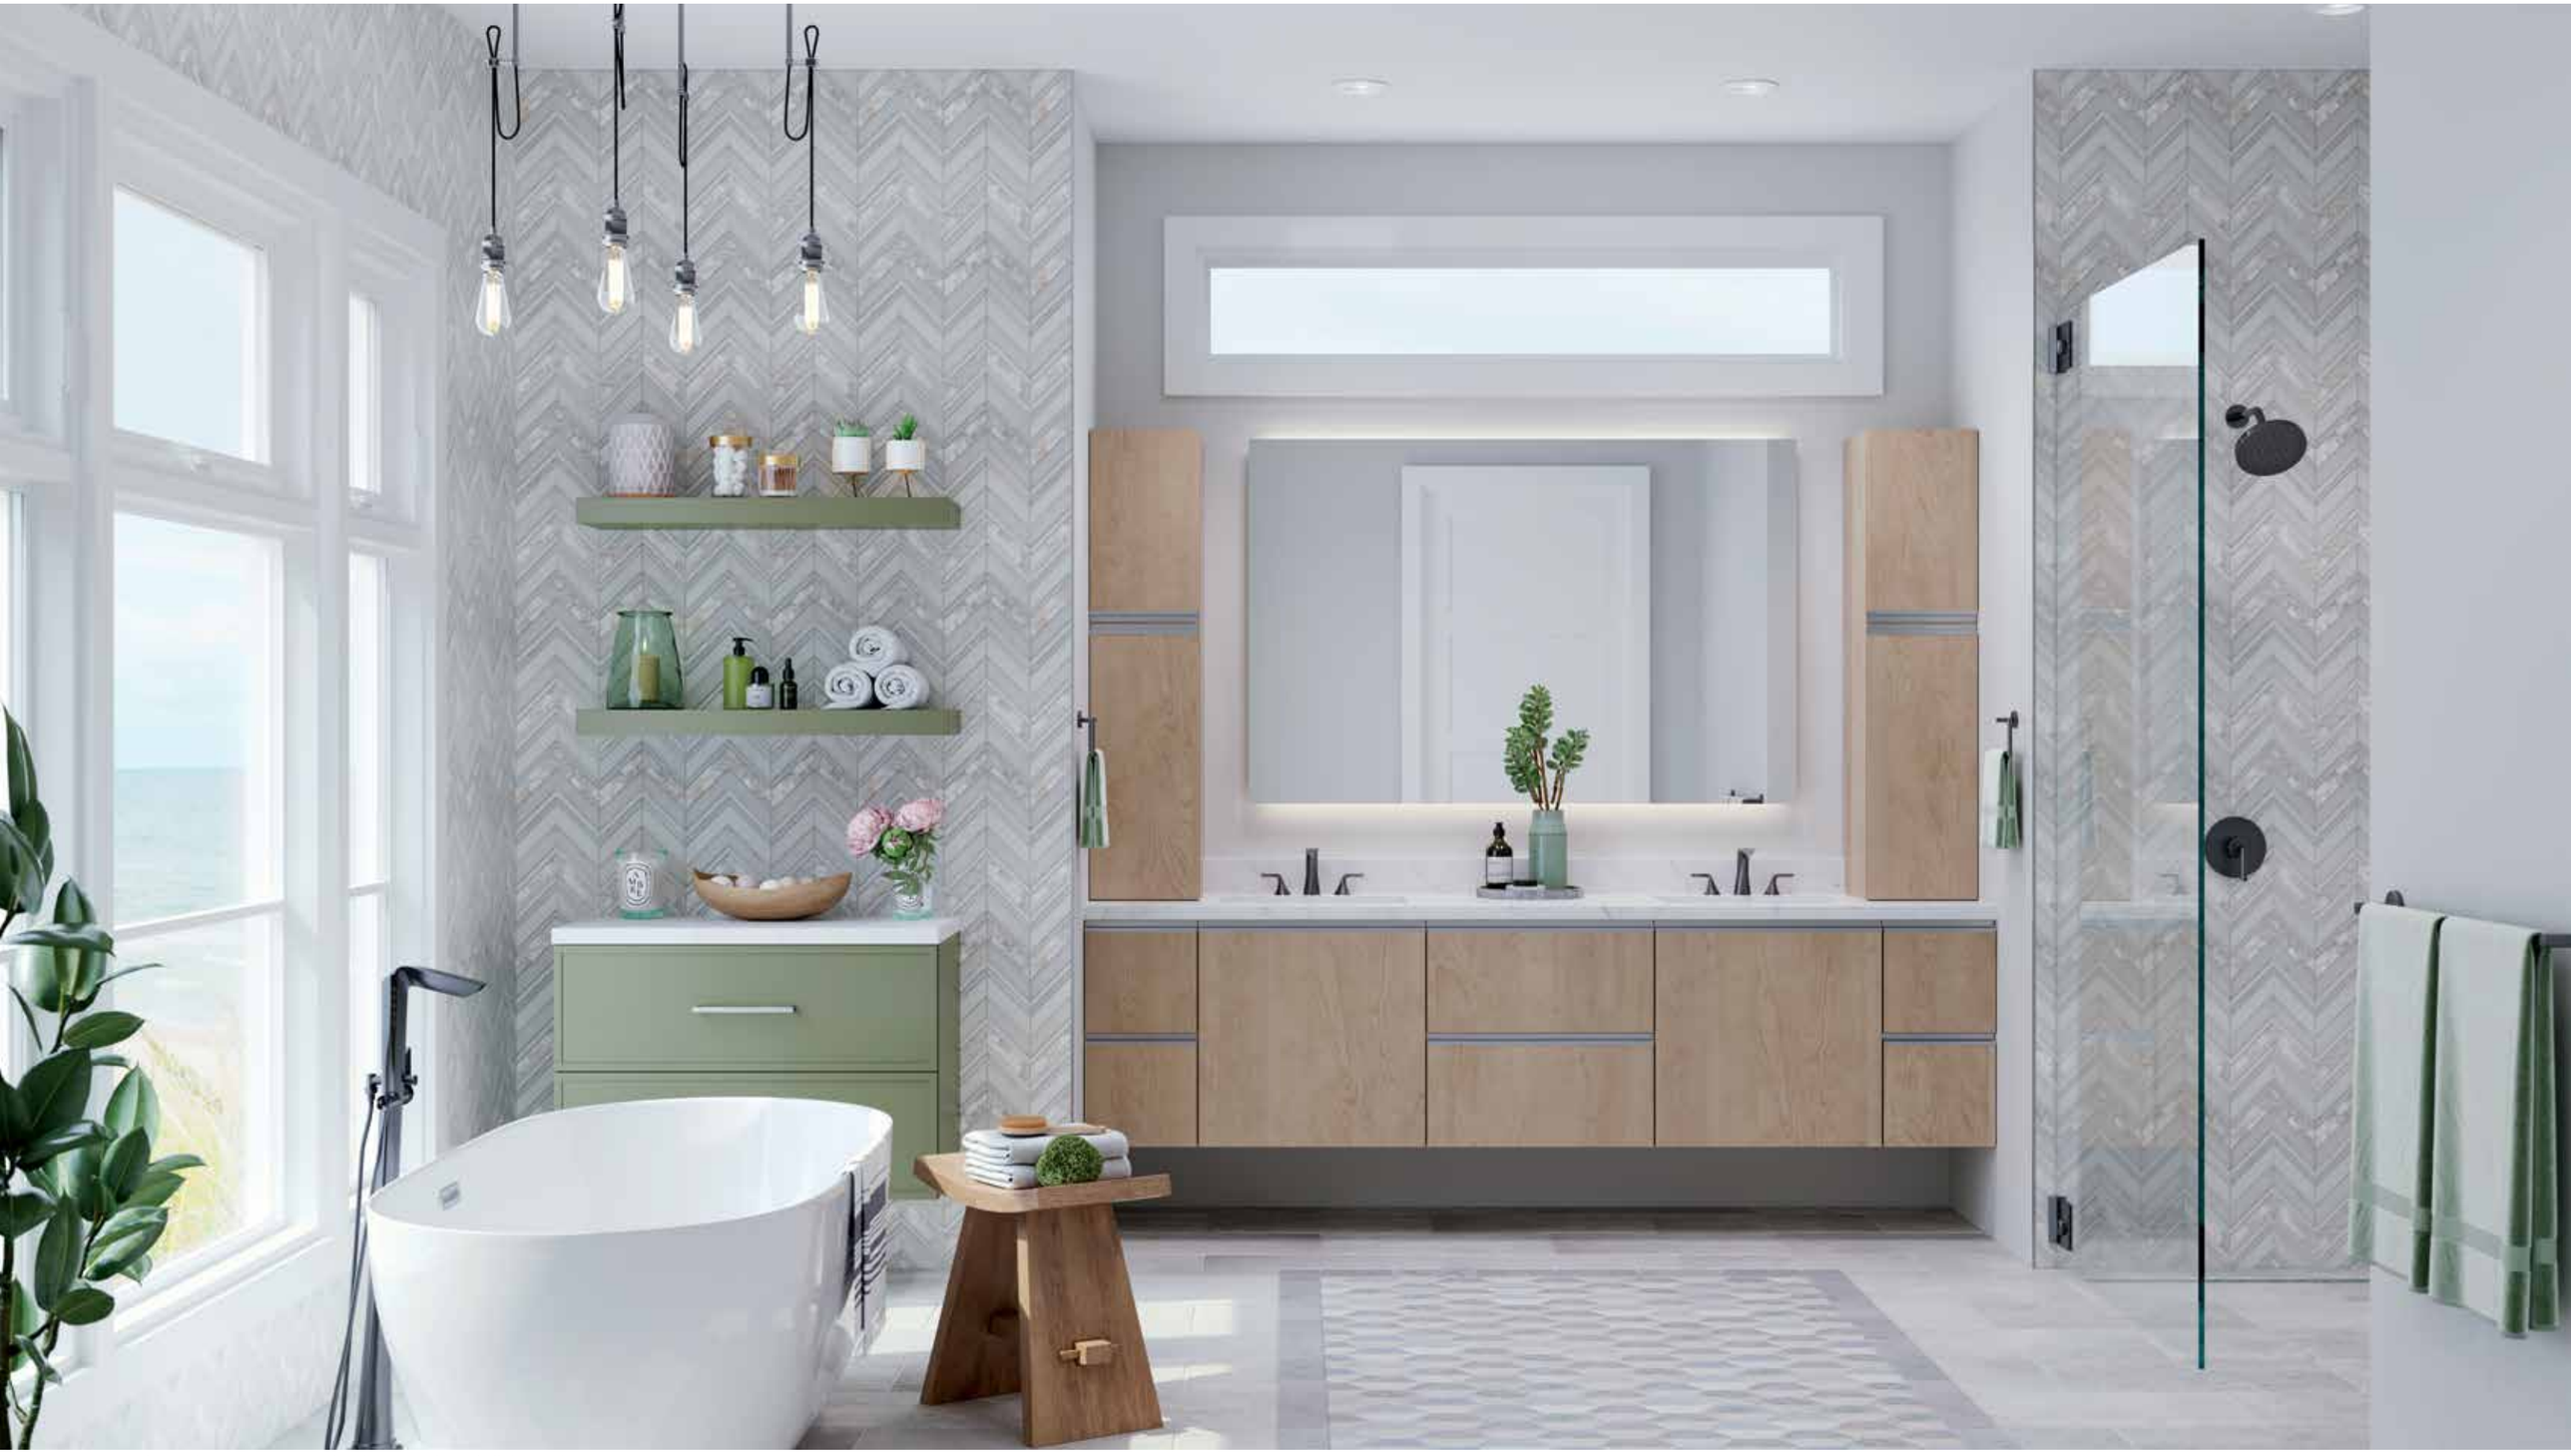

UltraMatte Acrylic

Our UltraMatte finishes feature a durable acrylic surface with a soft, low-sheen appearance that diffuses light beautifully. The velvety finish creates a sophisticated look while reducing reflection for a refined contemporary aesthetic.

Door styles: AA = Acrilux II/Aluminum-look Edgebanding E2 = Edgewater/Two-tone Edgebanding SB = South Beach/Matching Edgebanding

Not all colors and finishes are available on all door styles. Printed and digital materials should never be used for color matching. We recommend ordering a sample door to see the best representation of your selected color, finish, and wood grain contrast and patterns on your selected door style, before ordering cabinetry. Sample doors are more accurate than any website, printed literature, or designer's color chips. See your designer for details.

Piper door style in Charred and Archicrete Textured Melamine and AF006 door style in Natural Aluminum with Bronze Matte Tech Glass inserts.

Thinking Outside The Box

Our door materials are available as panels that can be used in your kitchen to cover... well, most anything. This homeowner and kitchen designer chose Archicrete Textured Melamine panels to wrap the island sides and back. Archicrete looks like concrete and ramps up the industrial style in this kitchen. Why not a "concrete" wall too? More panels cover the wall behind the cabinets all the way up to the high ceiling.

In addition to faux-concrete panels, we offer subtle-to-bright colors, silky matte, high-gloss, paint, textures, real wood, and simulated wood from bleached to weathered to charred.

Today's Look and Feel

Textured Melamine

Smooth is no longer the only option. Textured Melamine is becoming one of the most popular options for today's homeowners. Choose the 3D character and feel of a wood door but in a product that's virtually unaffected by changes in humidity, easy to care for, and affordably priced.

Modern technology has made melamine an incredibly attractive option in both price and look. Our Textured Melamine doors are made by thermally-fusing a printed, resin-covered, textured paper to a door made of medium-density fiberboard (MDF). The result is a durable, low-maintenance finish with an exciting texture that simulates a variety of real woods.

Our offering includes popular door styles which you can combine with an array of colors, wood grains, horizontal or vertical grain directions, and degrees of texture all of which will stand up to your life at home.

Coarse-Textured

Piper door style in Vineyard Oak Textured Melamine and South Beach door style in Naval UltraMatte UltraLux.

Thinking Inside The Box

15% MORE STORAGE SPACE!
Full-access cabinets have up to 15% more storage space than framed cabinets, and no knuckle-nicking frame or center stile to impede access to stored items.

INTERIOR FINISHES
Insides (and outsides!) are protected with moisture-resistant, easy-to-clean melamine. Interiors of cabinets with glass doors, or no doors, are color-coordinated to look great with the overall look of the kitchen.

SHELVES
Adjustable, full-depth shelves are 3/4″-thick, edgebanded, and supported with locking metal shelf clips.

HINGES
Durable, self-closing hinges are 6-way-adjustable for precision door alignment.

Learn more about Advantages and Performance Construction on pages 78-79.

Adriatic door style in Matte White Thermofoil, AF003 Metal door style in Onyx with Clear Tech Glass, and Sienna Textured Melamine panels.

Easy Care and Value

Thermofoil

Our Thermofoil doors bring you easy maintenance, long-lasting durability and beautiful styles, colors, and finishes, making this option one of the best values in cabinetry.

Made by the heat-and-vacuum application of a rigid vinyl to a door made of medium-density fiberboard (MDF), Thermofoil doors provide a flawless finish with a clean, smooth surface and superior stability.

Thermofoil is low-maintenance due to its moisture-, chip-, and stain-resistant finishes. Its easy care is appealing to many busy families. For most kitchen splatters and spills, Thermofoil cabinets can be easily wiped clean with a soft, damp cloth.

Door styles range from modern square- and beveled-edge slabs to traditional raised-panel looks with transitional, Shaker-style in-between. High-gloss on a slab-style door shouts urban contemporary, but any color on a door with a center panel captures the beauty of classic painted wood at a much lower cost.

Aurora Cabinet Lighting

A new kitchen is not complete without a custom-designed lighting plan for safely performed tasks, beautiful displays, and appropriate mood. Aurora is an energy-efficient, low-voltage, LED plug-and-play system that is easy to design and install. Work with your kitchen designer to illuminate your new kitchen in every right place.

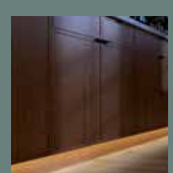

- Wall Switch or phone app adjusts
  - ▷ On/Off
  - ▷ Brightness high-to-low
  - ▷ Temperature warm-to-cool
  - ▷ Wireless Bluetooth operation
- More than 50,000 hours (23 years!) of average daily use
- 5-year manufacturer's warranty

PUCK LIGHTS
Ideal for showing off decorative items behind glass. Above wall cabinets, Puck Lights create circles of light on the ceiling.

LIGHT BARS
Beneath wall cabinets, Light Bars brighten countertops. Beneath open shelves they accentuate your fine taste in art.

LIGHT RIBBONS
Use above wall cabinets to set the mood, below wall cabinets to light countertops, and at toe kicks to night-light.

Maebry door style in Quartersawn White Oak with Bashful stain and in Maple with SW 0037 custom paint. AF002 door in Arctic Silver with Satin Tech Glass inserts.

Stickley door style in Rustic Alder with Natural stain and Lakeway door style with Blue Ash paint.

Mix, Match, and Marry

Many kitchen designs include combinations of colors, finishes, or materials. Here stained wood is paired with a contrasting paint color in two different door styles.

We love designs that pair recessed panel wood doors with slab doors. Gloss looks even brighter when paired with matte, and both shine paired with texture.

Choose more than one combination. Order sample doors of your pairings and look at them in your home to help you decide.

CUSTOM PAINT COLOR

Classic, Natural Beauty

Wood Door Styles

Wood is the most traditional choice for cabinet doors. Our Wood Program provides an incredible range of options that are relevant to today's design and architectural styles. You can achieve almost any look or ambiance you want by marrying the door styles, colors, and finishes that excite you.

Our selection of door styles is diverse: simple, traditional, ornate, multi-dimensional, raised panels, recessed panels, wide stiles, thin stiles, and more. And keep in mind each door can provide a very different look depending on the colors, finishes, and drawer fronts you combine.

Because they are a natural material, wood doors add an overall softness to kitchens, yet are strong and durable. Enhance their natural beauty with stains and finishes that allow the unique characteristics of your wood species to come through, like knots, color variations, and grain patterns. Or have your doors painted for a bolder, more consistent color presentation, still awarding you with wood's comfortable attitude.

Need a little more character than a stain or paint can provide? Check out our low-charge, specialty glaze and distressed finishes to further influence your unique look.

A Clean and Simple Wood Look

Slab Door Styles

Slab-style doors are the most modern of the wood looks, and are often seen in contemporary-style kitchen designs. Other than optional knobs or pulls, and the slimmest of architectural frames, the only ornamentation on a slab door is the finish itself— striking wood veneer or any paint color. Choose paint and the look will be about color. Choose wood veneer and show off the unique grain patterns of natural wood.

Unlike solid wood, these doors are virtually unaffected by changes in temperature and humidity.

Celebrate the Nature of Wood

Stained Wood

Pair your favorite hint of color with the natural beauty of wood and turn your new cabinetry into fine furniture for your kitchen. Our 14-step finishing process adds depth and richness to wood's color while bringing out the beauty of the grain.

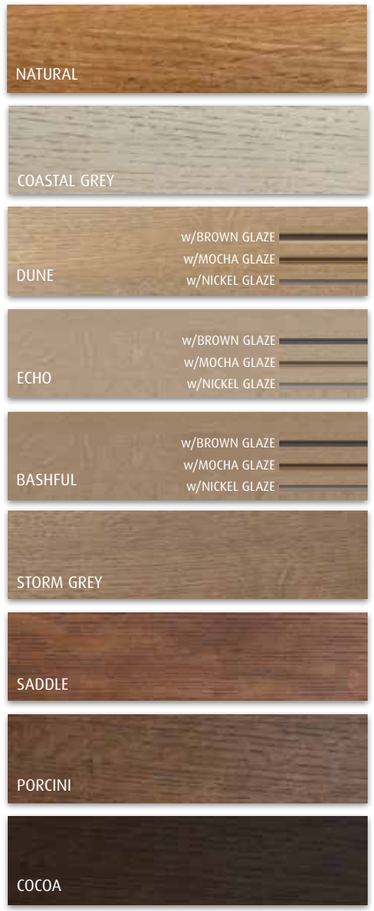

Red Birch

Maple

Quartersawn White Oak

Specialty Finishes

Glaze

Wood is stained or painted, then if desired, distressed. Glaze is hand-applied and rubbed away leaving color collected in crevices.

Aged

Stained or painted wood is randomly dented with special tools to cause stress cracks, and sealed with a clear top coat.

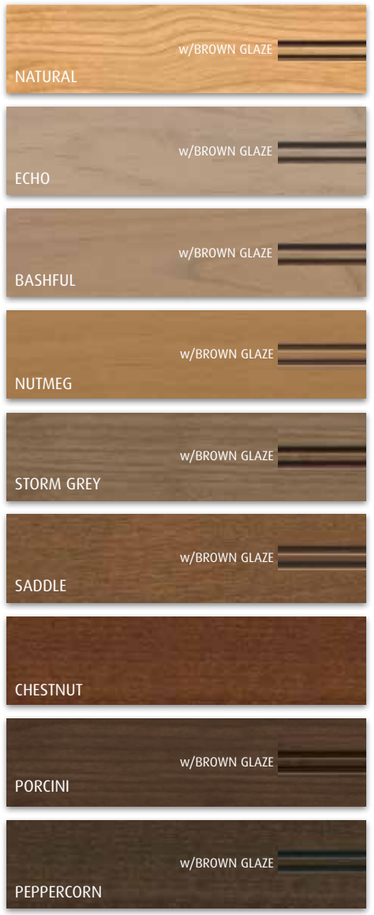

Worn

A blend of rasping, stress cracks, worm holes, dents, and smoothly worn edges. Available on stains with Low Sheen.

Walnut*

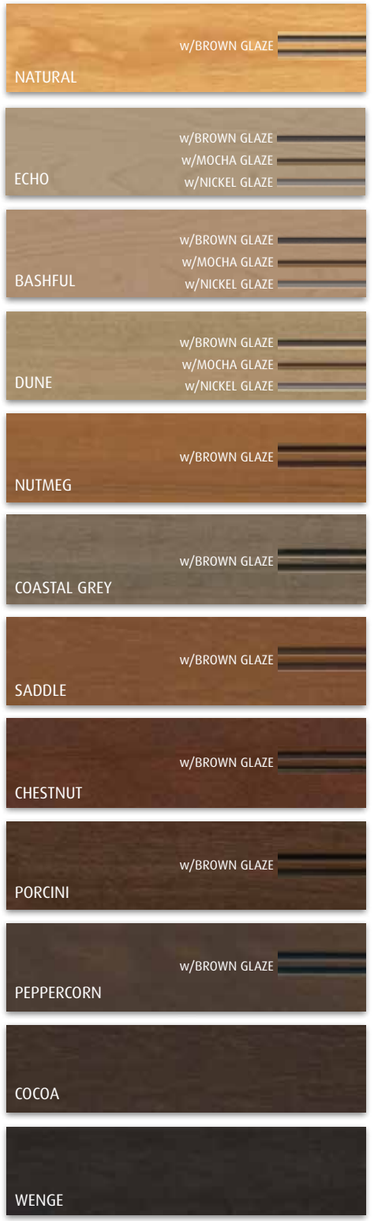

Alder and Rustic Alder

Oak

Cherry

Hand-applied glazing and distressing are custom effects and will be slightly different on each application. Not all colors and finishes are available on all door styles. Printed and digital materials should never be used for color matching. We recommend ordering a sample door to see the best representation of your selected color, finish, and wood grain contrast and patterns on your selected door style, before ordering cabinetry. Sample doors are more accurate than any website, printed literature, or designer's color chips. See your designer for details.

**Walnut is prized for its natural, wide-ranging variations in grain contrast, patterns, and color. Since no single image can capture the variety possible with Walnut, please consult with your designer about what to expect.*

Time-Honored and Current

Painted Wood

Painted wood doors are as popular as ever. We use a 14-step, furniture-finishing process for beauty and durability topped off with either Standard or Low Sheen. You can stop there, or you can layer in hand-applied specialty techniques for an even richer, unique look.

Smooth or Textured?

Every paint color is available on Maple or Oak. Your choice of silky smooth, or touchable texture.

Custom Paint Colors

Don't see what you want in our paint colors? Have your designer send us a paint swatch or a sample of the item you want to match, and our Color Masters will produce a custom paint color just for you. Then we'll produce a full-sized sample door in the style you choose so you can take it home and make sure you love it.
Ask to see the current Colour Couture selection – a designer-curated collection of trending complementary finishes.

Standard Paint Colors

ARCTIC WHITE	BEACH WHITE	REPOSE GREY	NETWORK GREY
SIMPLY WHITE	BALBOA MIST	ABBEY	MOON BAY
MELTED BRIE	PEBBLE GREY	SEAGRASS	HIGH PARK
WINGS	RAG & BONE	ARIA	SANCTUARY

MOSS GREEN	BLUE ASH		
MINERAL GREY	BOTTLE GREEN		
BASIL	FOUNDRY BLUE		
PEPPER	BLACK		

w/BROWN GLAZE
w/MOCHA GLAZE
w/NICKEL GLAZE

Backs of doors are painted, but not glazed or distressed.

Hand-applied glazing and distressing are custom effects and will be slightly different on each application.

Due to the inevitable and natural movement of wood, paint finishes may show some cracking at joints. This is not considered a defect.

Not all colors and finishes are available on all door styles. Printed and digital materials should never be used for color matching. We recommend ordering a sample door to see the best representation of your selected color, finish, and wood grain contrast and patterns on your selected door style, before ordering cabinetry. Sample doors are more accurate than any website, printed literature, or designer's color chips. See your designer for details.

Specialty Finishes

BROWN GLAZE MOCHA GLAZE NICKEL GLAZE

Glaze

Wood is painted or stained, then if desired, distressed. Glaze is hand-applied and rubbed away leaving color collected in crevices unique to each door style.

Linen Finishes

Primed and painted wood is lightly hand-brushed with Brown or Nickel glaze creating a linear, brushed look. Available on Maple or MDF with Standard or Low Sheen.

Vintage Finishes

An innovative blend of light glazing, rasping, rub-off, worm holes, stress cracks, dents, and smooth worn edges on any paint color on Maple. Sealed with a clear top coat. Low Sheen only.

Rubbed

Primed, painted wood is randomly sanded to reveal bare edges and high points, then sealed with a clear top coat. Add Glaze if available (no Linen, please). Always with Low Sheen.

Aged

Painted or stained wood is randomly dented with special tools to cause stress cracks, and sealed with a clear top coat.

Heritage

A combination of Rubbed and Aged detailing. Available on paints. Always with Low Sheen.

A Glint of Jewelry

Metal

Professional and commercial spaces do not hold the sole right to feature metal and glass in a kitchen. Expand your cabinetry design options by considering our versatile metal frames and glass for your central decor theme, or just sprinkled throughout your space.

The light and reflections inherent in glass and metal brighten spaces, granting a clean, polished environment, and can also make your kitchen look more spacious. Going heavier on the amount of metal will result in more of an industrial or commercial flair.

Can't quite go all in with metal and glass? No problem. Create the essence of your space with cabinetry you love, then add in a little bling. Metal pairs well with all of our other door materials in both transitional and contemporary styles. Just add a couple of metal and glass doors where they make sense functionally or where they can complement your overall design style.

It's easy to pull together beautiful doors from our Metal Program. The metal frames vary in width from barely there to a strong showing. If you choose a transparent glass, be sure to light up the room with our Aurora LED cabinet lighting system. Design a you-nique kitchen that isn't found anywhere else in the neighborhood.

Accessories

The fun of designing a new kitchen kicks up a notch when you're choosing accessories. We offer components that display, hide, spin, pull out, illuminate, and organize.

The cooks in your family will appreciate how well we organize spices, pots and pans, and how we free-up counter space with dedicated storage for idle counter appliances.

When you entertain, LED lighting mellows the mood, Soft Close drawer glides cushion the noise, and built-in wine racks add sophistication to the evening.

In the ultimate dream kitchen, everything has a place. The pantries arrange neatly, drawers stay organized, lazy Susans save time, trash bins hide, and the bi-fold, swing-out, and flip-up doors are ... well, they're just fun.

Enjoy the process of working with your kitchen designer and then revel in your dream kitchen reality!

Full Access Advantages

FULL-ACCESS DESIGN

UNOBSTRUCTED ACCESS

A full-access, or frameless, cabinet has no knuckle-nicking frame or center stile to impede access to stored items. Cleaning is easier too.

THE CLEANEST LOOK

Instead of a frame sticking out beyond the box, cabinet sides are seamless and flush.

Doors cover the entire face of the cabinet. It's called *true full-overlay*, and it's key to a clean, modern look.

15% MORE STORAGE SPACE!

Best of all, with no frame stealing space from cabinet interiors and drawers, full-access cabinets have up to *15% more storage space!* Go ahead and buy those large plates you've had your eye on.

LEADING-EDGE FASHION, FUNCTION, AND FIT

SO MUCH TO CHOOSE FROM!

We offer a comprehensive selection of today's most-popular styles, finishes, and materials from high-gloss to UltraMatte: acrylic, textured melamine, thermofoil, metal, glass, and of course, classic wood. No worries! Your professional kitchen designer will help you choose.

FINE FURNITURE FINISHES

If wood is your style, we offer Oak, Maple, Cherry, Alder, Rustic Alder, Red Birch, Walnut, and Quartersawn White Oak. Select from our palette of stains, paints, custom paints, glazes, Linen and distressed artisan finishes. All hand-crafted with our 14-step finish process.

CUSTOM STORAGE OPTIONS

Outfit your kitchen with accessories for the way you live: pantries, drawer organizers, spice and wine racks, waste and recycle bins... And, your home doesn't stop at the kitchen. Explore storage solutions for the bathroom, home office, playroom, and entertainment centers.

EXPAND YOUR BUDGET

We will custom-modify a cabinet's width, height, and depth, to 1/16″ for no charge.* Finished Ends are no charge, as are Finished Interiors.

** up to the next standard size cabinet*

CONFIDENCE AND ASSURANCE

TRY BEFORE YOU BUY

With our Sample Program we can ship full-size samples of your favorite door styles and finishes so you can live with them in your home before you decide.

KINDLY MADE, IN AMERICA

Our cabinetry is built in the heart of the country's furniture manufacturing industry, from domestically- and globally-sourced components.

100-YEAR LIMITED WARRANTY

PERFORMANCE CONSTRUCTION

ARCHITECTURAL SPECIFICATIONS

1. **Cabinet box** is manufactured with 5/8″-thick, environmentally-friendly, Engineered Furniture Board or All-Plywood panels; dowel-and-glue joinery.
2. **Back panel** is 5/8″-thick, fully-captured, machine-fitted and provides structural integrity and options for installation screws.
3. **Top, bottom, and sides** are flush for easier installation, easier application of footed mouldings and light rails, and a furniture-like appearance.
4. **Finish** for top, bottom and sides – inside and out – is White, Grey, or Neutral Woodgrain moisture-resistant melamine. Exposed edges (except inside edges of top stretchers) are edgebanded. Maximum coverage protects against moisture.

   Finished Ends, Finished Interiors, and Panels are color-coordinated with the door finish. Front edges have matching wood or coordinating PVC edgebanding.
5. **Full-width stretchers**, front and rear, provide solid support and a mounting surface for countertops.
6. **Toe-space blocking**, front and rear, for stability.
7. **Shelves** are 3/4″-thick, full-depth, edgebanded, adjustable, and supported with metal shelf clips.
8. **Hinges** are durable steel, fully-concealed, clip-on/off, self-closing, 110°, 6-way-adjustable (for precision door alignment), with a lifetime manufacturer's warranty and soft-close operation.
9. **Wood Dovetail Drawers and Pull-outs with Soft Close**
   The drawer box has 5/8″-thick, solid wood on all four sides, dovetail joinery at each corner, and 1/4″-thick, fully-captured bottom, all in natural-finish Birch (standard) or Walnut (upgrade). Soft Close glides allow smooth and silent closing. Glides are a full-extension, tandem, undermount system with a 100-lb. static / 90-lb. dynamic-load rating. Glides have a manufacturer's lifetime warranty.

   Wood Dovetail Drawers are standard on cabinets with all door styles except UltraLux.
10. **Metal Drawers and Pull-outs with Soft Close**
    Blum Legrabox. Sides are fingerprint-less metal with a stainless steel look. Bottom and back are 5/8″-thick grey melamine. Soft Close glides are a built-in, full-extension, undermount system with 125-lb. static / 110-lb. dynamic-load rating. Glides have a manufacturer's lifetime warranty.

    Metal Drawers are standard on cabinets with UltraLux door styles and available as an upgrade with all other door styles.

    Touch-to-Open
    An upgrade to the Metal Drawer. Open the drawer by pressing on the drawer front; eliminate the need for decorative hardware.

Richmond II door style in Oak with Storm Grey stain and AF006 Metal door with Onyx frame and Mist Gloss Backpainted Tech Glass.
